

## National Resource Hub v1.2 Release Notes

### **OneResponder:**

- Added functionality so that tasks that are completed for an issued PTB will reflect as completed in other issued PTBs that share that common task.
- Reduced Workflow Notification “noise” by preventing Workflow Notifications from extending beyond the immediate responsible organization
- Home location information is now required for new organizations added to OneResponder
- Removed beta/test wording from notification and invitation emails.

### **Resource Inventory System:**

- Removed extraneous fields from user creation screen.
